PALMA BAMBOO®

- Neo retro design: this clock with sober lines has been revamped to be trendy and modern thanks to its 100% natural bamboo dial
- **Readability:** a dimension of 30 cm for maximum readability up to 35 m thanks to the large sizes of its black numbers.
- Ergonomics: thanks to its silent system, the second hand emits no noise creating a framework conducive to concentration for work
- Accuracy: high quality Quartz system allows a reliability of a difference of 1 sec in 6 years of operation.
- Complementary products: floor lamp perfectly coordinated with the BAYA BAMBOO lamp, BALY BAMBOO uplighter and the BORA BAMBOO coat stand

• Operation: Powered by a 1.5 V (AA) battery supplied

• Thickness: 3.5 cm

Dimensions: diameter: 30 cm

Weight: 0.77 Kg*

Average consumption: 0,21 Am*
Quick wall fixing with 1 eyelet
Materials: bamboo wood frame

*Non-contractual data

UNILUX'S ADVICES

1- Why use a clock?

A clock is a must-have accessory that fits perfectly into any room in your business: individual office

- open space
- meeting room
- Passing places
- lobby

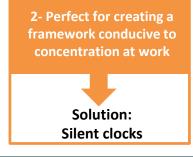

Setting up a clock in a workspace allows employees to avoid checking the time on the smartphone or tablet time and therefore not be tempted to look at their messages or browse the internet by same occasion. Thus a clock allows to gain in concentration and productivity because the employees are less distracted.

For good readability from a distance, it is important to have:

- good contrast between the background of the dial and the color of the numbers (better contrast with white background / black numbers)
- A good height of the figures (about 3cm minimum) and in Arabic characters preferably

In addition, the choice of a clock can be made according to different needs on the part of the consumer.

2- Some definitions

Quartz system

The quartz pendulum mechanism, based on the piezoelectric phenomenon, is one of the least energy-consuming, with a reliability of one second deviation in 6 years of operation.

Radio-controlled system

The time is automatically and permanently adjusted by radio waves from the Mainflingen atomic clock (high precision: 1 second difference maximum in 1 million years)

Step movement

Second-hand movement of the second hand

Sweep movement

Continuous movement of the second hand
