

The New Whiteboard For The New Classroom

eGlass is an illuminated glass whiteboard with a built-in camera that captures your face and writing in the same frame.

eGlass™

Boost Student Engagement

Students see your face as you write, enabling you to give critical non-verbal cues with gestures and expressions, while building one-to-one connections. The vivid glow of the ink draws the attention of students, immersing them in the lesson.

Create Digital Equity

Every student gets an equitable learning opportunity, seeing the teacher's face and glowing writing whether they're in the front row, back of the class, or learning remotely.

How It Works

Write on the glass *normally*, facing your students. ChromaClear technology injects light into the glass, giving the ink a *vivid glow*.

The *built-in camera* captures your face and writing in the same frame, and *flips the image* so text reads correctly.

Connect eGlass to your PC, Mac, or Chromebook with the included USB cable, and run the eGlassFusion software.

Project onto your *classroom display* by connecting your laptop. Your writing is larger than life and every student has a *front row seat*.

Perfect For The Hybrid Classroom

- **MediaPlay** pulls any media, any lesson plan, or application onscreen for you to interact with.
- **Chameleon** automatically removes the background from your content.
- **Record** lessons, take **SnapShots**, and more!

The Right Size For You

Frequently Asked Questions

Do I have to write backwards? No, the built-in camera flips the image so text reads left-to-right.

Is eGlass a display? No, eGlass is a lightboard with a built-in camera. You connect eGlass to your computer, and your computer outputs the image onto your classroom display.

How strong is eGlass? Ridiculously rugged, and it is covered by a 5-year warranty.

What kind of markers do I use? Use regular dry erase markers or neon glassboard markers.

How big is eGlass? 35" and 50" diagonal options are available.

Does it work with Zoom, Microsoft Teams, Google Meet, etc? Yep. Simply select eGlassFusion as your camera input on any virtual conferencing platform.
